

## Product features MC 786

---

Semiconductor casing:	TO-218 ; TOP-3
Semiconductor mounted by:	Clip Mounting
Material	Stainless Steel

## Further information

---

Mounting clips facilitate the safe and efficient mounting of semiconductors to heatsink with the corresponding hole pattern. Especially for insulated mounting, a clip provides reliability by making screws and insulation bushes dispensable. Central contact pressure distributes the heat conductivity equally across the semiconductor/heatsink contact surface. - Material: Stainless steel (1.4310) - For cases: TOP3 (TO218)
