

Date 17.11.2022

Regarding: REACH – EC Regulation No. 1907/2006

Dear Sir or Madam,

The pre-registration phase for the REACH regulation ended on 1<sup>st</sup> December, 2008.  
Since that time, only the use of pre-registered or registered chemicals has been allowed.

All manufacturers or importers of chemicals are affected by the (pre-)registration.  
Users of chemicals who purchase them within the EU, as well as downstream chemical users, are not affected.

As a manufacturer of heatsinks and cooling accessories for electronic components, we are not affected by the REACH regulation.

We assume that the materials in the products we buy have been preregistered or registered by our upstream suppliers.

In addition, we have taken steps to ensure that the chemicals we use have in fact been registered by our suppliers.

This includes the candidate list of substances of very high concern for authorization as updated 10/06/2022 and now including 224 substances. (published in accordance with article 59(10) of REACH Regulation).

Link to list : <http://echa.europa.eu/web/guest/candidate-list-table>

We confirm compliance with the REACH regulation for the products we deliver
